

# Force Gravity on Planet

Step 1: The three problems you will be solving all involve the same three variables. Put the variables into the picture below. Then next to the picture list the names, descriptions and units of these variables. Finally, write down the equation that links these variables together

Step 2: Show the work you did to get your first answer

Step 3: Show the work you did to get your second answer

Step 4: Show the work you did to get your third answer
