

Wave Properties from Graph 3

Step 1: Carefully sketch out both of your wave graphs on the axes below

Step 2: Explain how you got the amplitude in the space below (which graph did you use)

Step 3: Explain how you got the wavelength in the space below (which graph did you use)

Step 4: Explain how you got the frequency and period (which graph did you use)

Step 5: Explain how you got the speed of the wave. Enter your answers into the program to verify that you did everything correctly
